

## PROFESSIONAL SUMMARY

Shaped by frequent relocations and international exposure, my Franco-Lebanese background has instilled in me a deep sensitivity to social difficulties and educational challenges. This awareness has driven me to engage in social initiatives, including volunteering in tutoring and establishing a national Business & Technology club. I thrive at the intersection of adaptability, analytical rigor, and teamwork. I am comfortable operating in fast-paced, multicultural environments and bring strong financial and analytical skills, including the ability to understand business workflows, financial performance, and strategic alignment. With a solid command of technology, Google Workspace, financial automation, and AI-driven tools, I focus on improving efficiency, accuracy, and decision-making. Curious, driven, and people-oriented, I aim to contribute effectively to finance and tech teams in a transaction-driven environment.
